

YOUR BRIDGE TO INDEPENDENCE

MOBILE TUB SLIDER SYSTEMS MC6000 SERIES

Your Bridge to a More Independent Life

Nuprodx bath mobility systems are made in the USA and built to fit your exact needs. Each model is highly configurable to accommodate different user sizes, bathroom setups, and personal preferences. A wide selection of custom cushions provides comfort, pressure relief, and a tailored fit. Constructed with aircraft-grade aluminum, brass, and stainless steel, every system is lightweight, corrosion-resistant, and durable. All models fit over standard and ADA-compliant toilets and are compatible with most bathtubs and showers.

MC6000 Tilt

MC6000: Our Most Popular System

The **MC6000 series** combines a commode chair, tub slider, and in-home mobility chair in one versatile system that fits most bathroom setups. With just one bedside transfer, riders can move safely across the tub wall—no risky multiple transfers required. Once the chair is in place, the bridge can be removed and the shower curtain closed for privacy. Standard features include a 17" x 17" seat (optional 17" x 20") and flip-up locking cantilever arms for easy transfers. The modular design allows for a wide range of custom configurations and accessories, making it a trusted choice for comfort, safety, and independence.

Narrow Shower Solutions

The **MC6000RS** fits through entries as narrow as 23", making them perfect for compact shower stalls. Easy to maneuver once inside the shower. Available with tilt (MC6000 RS Tilt) to centralize weight for safer transfers and positioning.

Tilt, Heavy Duty and Travel

Tilt models centralize weight for safer transfers, support easy caregiver access for hygiene, and feature a side-mounted crank for effortless operation. The **MC6000 Tilt** is ideal for users who need added stability or caregiver-assisted bathing.

A heavy-duty option (**MC6200**) has all the benefits of the **MC6000** with a larger 20x20" seat frame (optional 20 x 17") and a 400-pound weight capacity for added strength and stability. The aircraft-grade aluminum is strong and lightweight. Also, it is available with tilt (MC6200 Tilt).

For travelers, the **MC6000 TX** weighs just 42 lbs., assembles quickly with one tool, and provides access to almost any bathroom—no ADA setup required.

MC6000 LECKEY

Pediatric Options

The **MC6000Ped Series** offers pediatric-appropriate seating with the ability to adjust the effective seat depth, 10.7-17.7", and effective seat width, 17", 15", and 13", making it configurable to any child's size. The **MC6000 Tilt Ped** adds tilt-in-space to centralize weight, improve posture, and provide easy caregiver access. The **MC6000LECKEY** features full-body support, a breathable removable mesh cover, and an adjustable back angle for flat or upright seating, ensuring comfort, stability, and safety during bathing.

Accessories

Nuprodx accessories help each system fit perfectly. Options include positioning belts, laterals, hip guides, commode pans, and custom cushions in multiple sizes, shapes, and gel options for skin protection.
