

SymmetriSleep[®]

Revolutionizing 24-hour Postural Care

SymmetriSleep®

Comprehensive Lying Postural Care

SymmetriSleep is a 24-hour postural care system designed to maintain body symmetry and provide support during lying throughout the day. It provides a structured, yet flexible solution for managing posture, pressure, and comfort.

Effective Pressure Redistribution

The system's Airmantle layer promotes gentle pressure redistribution, reducing the risk of pressure injuries while improving overall comfort.

Temperature Management

CoolOver fabric both absorbs and releases heat, creating a consistent skin temperature, and improving thermal comfort.

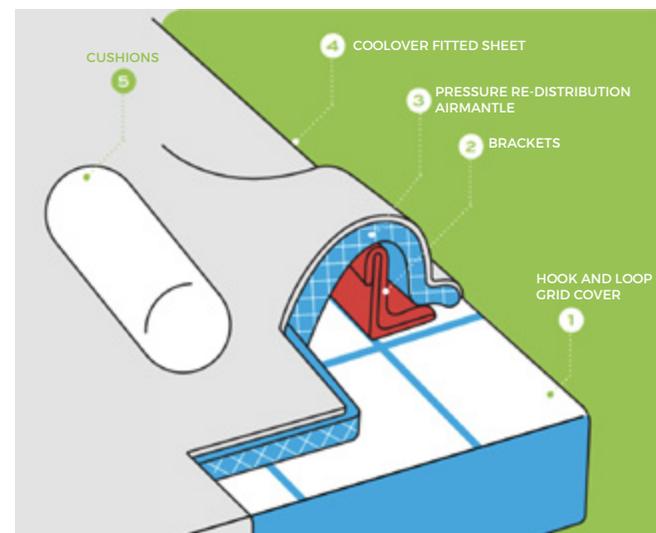

Dynamic and Adjustable Support

The Hook & Loop Grid Cover and accompanying brackets provide passive therapy by offering stable, non-moving support. High-density shredded memory foam cushions compress and respond to changes in body position, delivering dynamic therapy. Additional components can be introduced gradually as tolerance builds, supporting long-term compliance and comfort.

Ease of Implementation Across Settings

SymmetriSleep works with any bed or mattress type—from twin to queen-size, including alternating air mattresses. It supports a variety of lying positions, including supine, side-lying, semi-side, and prone. Sticker charts simplify setup for caregivers and families, while starter packs streamline the ordering process. This system enables consistent postural management in homes, clinics, or community care environments.

Components for SymmetriSleep

SIMPLE ORDERING PROCESS

Choice of 2 starter kits, depending on the height of your client. Each kit includes the following:

MEDIUM STARTER PACK For clients between 3.5ft - 5ft. Tall	LARGER STARTER PACK For clients over 5ft tall.
