BeMe Advanced

BeMe Basic

BeMe Seating Systems
Designed to Grow. Built to Support.

Why Choose BeMe?

The BeMe family offers three innovative, growable seating solutions that adapt to every stage of a child's development. With a modular design and interchangeable components, BeMe ensures comfort, function, and posture—today and tomorrow.

- **Configurable & Growable** - Upgrade the seat or back to a different size or configuration as your child grows and changes—no need to replace the entire system.
- **Postural Support for Every Need** - From mild positioning to complex alignment demands, BeMe meets a wide range of clinical requirements.
- **Patented Accordion-Foam Technology** - Delivers continuous support without gaps or added inserts, ensuring comfort and stability with up to 5" of built-in growth.
- **Interchangeable Options** - One family, endless possibilities. Accessories work across all models and sizes for maximum flexibility.

One Family. Infinitely Configurable.

BeMe Basic – Provides mild-to-moderate, growable postural support with an innovative anti-thrust cushion and an expanding backrest to maintain pelvic and trunk alignment as children grow. It promotes midline posture, comfort, and participation without complex positioning components.

BeMe Moderate – Supports children with moderate-to-complex postural needs requiring increased pelvic, lumbar, and trunk stability. A growable contoured seat and multi-adjustable segmented backrest with a fully adjustable sacral pad promote stable, functional upright posture.

BeMe Advanced – Supports children with complex, non-reducible postures through a growable split seat and 3D adjustable backrest. Its modular design provides the stability and alignment needed to manage severe asymmetries and maximize function.

The Perfect Match

When it comes to bases, BeMe is the perfect partner for your base of choice. Choose between the Multi-Height and Tilt Base (Hi-Lo), ZIPPIE IRIS or ZIPPIE Q300 M Mini to find the perfect match for your BeMe seat.
